PEPPOL

Pan-European Public Procurement Online

SWEDWISE

Secure and easy e-invoicing

For all of us who do business with the public sector, the PEPPOL format is compulsory from 1 April 2019. For others, it will reduce costs and simplify the handling of e-invoices and e-commerce. The business opportunities that come with PEPPOL are several.

Does your company belong to those whose customers wish, require or offer e-invoicing? Fast and secure flows aren't always the same thing as flexibility at lower costs. But with PEPPOL it's different…

SWEDWISE

Secure and easy e-invoicing

" It is easy to connect new business partners and manage communications between different solutions. PEPPOL is open to all and is soon established throughout Europe"

DIGG – Agency for Digital Government, September 2018.

SWEDWISE

Earlier e-invoicing solutions

The previous solutions often required a direct link between two companies. The more customers and suppliers, the more connections. A connection for each receiving client sometimes creates hundreds of connections.

SWEDWISE

A new standard with PEPPOL

With PEPPOL, a company with a (1) fixed address is registered and the connections are made through the central PEPPOL service to all other affiliated companies.

SWEDWISE

Get started with PEPPOL

By sending your XML file via Swedwise WAN service, you reach all PEPPOL-connected companies. All your customers and suppliers get the rest of the e-invoice formats sent to them on the basis of the same file. If your billing system cannot send information in XML format, Swedwise can help you with that too.
