

CASE STUDY

Region Stockholm

Improved information flows through faster, simpler, and more secure system integration.

Region Stockholm is responsible for healthcare, public transportation, regional growth and development, as well as contributing to a free and accessible cultural life. Every day, Region Stockholm sends out thousands of sensitive healthcare documents. The information is often complex and moves between internal and external logistics flows.

Challenge

Today's healthcare organizations face a critical need to integrate patient and administrative information, as well as improve service delivery and patient care efficiency. To achieve this, Region Stockholm needs to manage a platform consisting of both synchronous and asynchronous flows of information between approximately 2,000 healthcare units within Region Stockholm.

To be able to introduce newer and more flexible technologies and agile processes to traditional EDI management, this platform requires very high SLA (Service Level Agreement) requirements, 24/7, all year round.

Solution

Swedwise Healthcare Suite is a platform composed of various modules (including Mulesoft Anypoint Platform, Xware xT, and Nodinite) for both the latest API-driven development and more traditional EDI traffic in large volumes. It also supports healthcare standards such as ETL processing like HL7 (v2 and v3), DICOM, FHIR, CDA/CCD, and the ability to deploy

“Swedwise has unique competence which is extremely beneficial.”

Region Stockholm

application networks faster and easier. Swedwise provides expertise and 24/7/365 support to Region Stockholm for the entire integration platform.

Result

Swedwise Healthcare Suite platform handles all aspects of system integration, providing easy and smooth management with high security, combined with efficient and agile support.

About Swedwise

Through automation, we enable your business to focus on the value generation and become more successful. We reduce costs by leveraging modern technology coupled with expert consultancy in order to enhance your investments in existing systems.

Together with our partners, we can share our experience and help you succeed with integration methodologies including Hybrid Integration, API-driven solutions, and Microservices. Contact sales@swedwise.com or call ++46 54 13 63 00.

SWEDWISE

Swedwise is an IT company with offices in Karlstad and Stockholm. Since 2010, we offer software licenses, consulting, software development, and support.
