

The right tool for every integration

Bring your people, systems and AI together with an intelligent, flexible integration capability built to last. We help you choose the right tools for your environment to create secure and reliable information flows that evolve with your needs.

MuleSoft

**Complex API management
and agentic AI**

Reusable APIs with
AI agents in a governed
control layer.

xT

**Business-critical messaging,
APIs, B2B and EDI**

Secure, traceable message
flows at high volume,
in your own environment.

Inobiz

**Standards-heavy data
mapping and transformation**

Visual mapping for
standards-heavy
integration work.

Nodinite

**End-to-end observability
and monitoring**

Traceability, alarms
and dashboards across
every flow.

Starlify

**AI-ready landscape
mapping and governance**

A living, AI-ready map of
your integration landscape.

Make time for the good
