

A secure backbone for business-critical information flows

Connect modern and legacy systems
with the xT integration platform,
so your business can keep moving.

Security

Built for demanding
environments where
reliability is critical

Flexibility

APIs, EDI, file-based
integrations and legacy
in one platform

Control

Visibility across flows,
dependencies and
operations

Make time for the good

Delivered by Swedwise, Exclusive Nordic Partner.
xT is developed by WiseTech Global and has
17,000+ customers worldwide.

Deliver business-critical messages. Secure and traceable – every time.

xT keeps business-critical information flows running as your integration landscape evolves. Combine operational resilience with the flexibility to adapt without compromising stability, security or control. If systems or networks are disrupted, xT's message handling is designed to recover without messages being lost or corrupted.

Visual integration

xView makes integrations easier to understand, configure and maintain.

One place to integrate

APIs, SOA, EDI and more, managed in a single platform.

Operational insight

Real-time monitoring helps teams detect issues earlier and keep flows running smoothly.

Deploy your way

Run on-premises or in any private or public cloud, with high availability options.

ABOUT SWEDWISE

Swedwise helps organisations create intelligent information flows where people, systems and AI agents work together securely and effectively. The result is digital clarity: a clear view of how the organisation connects, and time for what matters most. "Make time for the good" is how we describe it. Over 100 customers across the private and public sectors.
